

## Delivery Programme Edge Shape

Apart from the commercial edge shapes, the versatile applications of our products require further edge treatments depending on the special requirements of our customers.

We supply material edges that respond to this request.

### Edges shapes

Cut edge - reduced burr upon request

Deburred/chamfered edge (sharp)

Rounded edge (rolled) - semi round

Rounded edge (tooled) - fully round

sharp-planed edge

### Further edge shapes

In addition, there are the following possibilities for up-grading the product:

**Plane rolled surface** - to optimize flatness

**Slightly re-rolled surface** - to increase tensile-strength

### Tolerances

Principally, our production is in line with DIN EN ISO 9445, closer tolerances, special executions and restrictions (i.e. special analysis) can be agreed upon.
